NANO TECH AUTO

INTERIOR & TRIM DETAILER

Long Lasting Protection

Protects against Extreme Conditions

PRODUCT INFORMATION:

NanoTech Auto Interior Detailer is easy to use.

Its revolutionary cleaning technology allows you to clean and wax any surface in one go, while needing no water at all. Works very well for all types of vehicles, bikes, planes, boats, trucks, trains.

It contains unique nano particle lubricants and cleaning agents that work together to lift and surround (emulsify) dirt or foreign articles.

This allows one to safely wipe the surface clean, with-out any fear of harming the surface.

A residual hydrophobic layer is formed, that result in a high gloss finish.

PROPERTIES:

- Clean and Polish
- Hydrophobic
- Repels water
- Headlight restorer
- Wheel and Rim Cleaner
- Light scratch and scuff mark remover.
- Plastic and rubber trims shine

INSTRUCTIONS:

- Shake well before use and do not apply indirect sunlight.
- Best results if applied in small sections.
- From 20-30cm, spray a light layer onto surface for cleaning of moderate dirt and leave to soak for 2-3 minutes. On stubborn stains, allow to soak for 5-7 minutes.
- Use a terry cloth (towel material) to gently rub the Waterless Wash & amp; Wax in circular motions to remove dirt and leave a waxy haze. In cooler temperatures, the wax haze may take longer to appear.
- Use a clean microfiber cloth, to buff the nano-wax haze for a polished finish.
- The Nano coating lasts up to 30 days.
